Summary

Computer science student and open source contributor. LFX 2026 mentee on PipeCD (CNCF), focused on plugin development, documentation and developer experience. 51 merged pull requests to open source projects, 45 of them across PipeCD.

Open source

PipeCD (CNCF) · LFX Mentee 2026

2026

- Wrote the PipeCD v1 plugin tutorial, chapters 1 to 9: setup, config types, lifecycle methods, sync stages, DIFF, SYNC and ROLLBACK, wiring main.go with Piped
- Expanded the v1 plugin docs: Kubernetes, Terraform and Analysis plugins, stage plugins (wait, wait-approval, script-run), plugins overview
- Split pipe-cd/examples into v0 and v1 and added v1 Kubernetes examples (simple, bluegreen, wait-approval, helm local chart)
- Added the v1 Application Configuration Reference and user guide pages (deployment trace, secret management, drift detection, rollbacks)
- Moved docs and examples from gcr.io images to ghcr.io
- Staffed the PipeCD booth at KubeCon India 2026

Other contributions

2025 to 2026

- KubeStellar (core, UI, docs), Sugarizer, Meshery, Gumroad, first-contributions

Experience

PlanetRead

- Built two Adobe Premiere Pro plugins for Same Language Subtitling, live on Adobe Creative Cloud (Click and Align, Slide and Align)
- Migrated the BookBox app completely to React Native (10k+ downloads on Google Play)
- Prototyped a burn-in subtitle checker (OCR plus speech transcription) for C4GT DMP 2026

Cricmaths (BIRD initiative)

- Built an API normalisation layer and a practice mode for a site with 1,000+ daily active users

Projects

- **cloudrun-mvp** (Go): PipeCD CLOUDRUN_SYNC flow against real Cloud Run, proof of work for a GSoC 2026 proposal
- **saytask** (Python, macOS): voice and terminal capture into Google Tasks
- **EduLite** (PWA, Supabase): offline-first learning app with regional language translation
- **Suspicious activity detector** (Python, YOLO): real-time video analytics

Skills

Go · TypeScript · React / React Native · Kubernetes · Docker · GitHub Actions · Python · C / C++
